

About Us

Interquattro is a newly established company specialized in the design and production of small metal parts. Born from the take-over of a branch of a historic spring manufacturer in Turin, we operate in a variety of fields such as the automotive industry and car spare parts, civil and industrial locks, the building industry, electrical components, the electronics industry, the white goods industry, the plumbing and heating sector and writing components.

The range of products includes:

- Torsion springs
- Shaped springs
- Compression springs
- Elastic fastening systems
- Elastic contact systems
- Connectors
- Components made from metal tubes
- Small metal parts

We also have an heat treatment department, an annealing and polishing treatment department and an mechanicals precision machining department that complete our production cycle.
